Get 10 years experience in only 12 months

Are you looking to get urban EMS experience and live in a city that is thriving like no other in the U.S.? What better place to be than at the Jersey City Medical Center's EMS Department in Jersey City, NJ. Here, you will gain experience in your first year that would take five to ten years in a suburban EMS organization.

As one of the largest and busiest EMS systems in the state, JCMC EMS now triages, treats and transports more than 80,000 patients a year! We also play a vital role in domestic preparedness education, homeland security response and educating the public and healthcare providers in CPR.

To find out more about our program, call or email Steve Cohen at 201.395.5090 or scohen@libertyhcs.org.
