

Enhancing Life Through Innovative Interdisciplinary Care

Introducing The Outpatient Balance Center at Jersey City Medical Center

377 Jersey Avenue (Skinner Memorial Drive) Jersey City, New Jersey

Located on our beautiful Jersey City Medical Center campus and managed by Continuing Care, The Outpatient Balance Center at Jersey City Medical Center was established to diagnose and treat a wide range of balance disorders. Housed in our new Medical Office Building and Ambulatory Surgery Center, The Balance Center is fully wheelchair accessible and has available parking and convenient access to the Jersey Avenue Hudson-Bergen Light Rail station. Our highly trained staff can often diagnose your condition through a series of relatively quick and non-invasive tests – and a qualified panel of JCMC Physicians will review and interpret your results and communicate them to your Physician within a week.

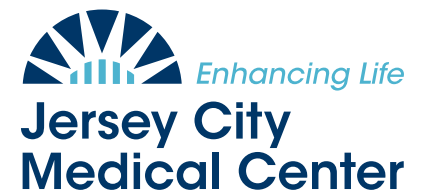

The Balance Center can help with a variety of balance problems, including:

- Trouble getting up from a seated or lying position
- Frequent falls
- Trouble keeping your balance when standing
- Numbness in your legs or feet
- Difficulty walking on steep surfaces
- Difficulty perceiving distances while walking
- Feelings of dizziness
- And more
